Laser Hair Treatment

Laser Hair Treatment - Breaking News:

A new study published in the International Journal of Cosmetic Surgery and Aesthetic Dermatology showed a 93% increase in hair among the respondents using the Laser in the study! Long term international and Recent Clinical Trials with the Laser suggests many benefits from laser hair treatments. One recent study showed that more than 90% of users achieve some positive benefits and results. In addition, more than 44% of users see noticeable indications of benefits from use of the laser within the first 6 weeks. Another 45% see results within 6 to 12 weeks and rest see subtle improvements after 12 weeks. A Laser received certification by the Canadian Government to claim and indicate that it strengthens hair, prevents hair loss and stimulates re-growth of hair in men and women. Barbara Walters on 'The View' recently called the a 'Hot New Product'.

Since the late 1700s, scientific studies have shown that sunlight- or the lack of it- definitely affects our body's biochemistry. Light also affects our hair, including how fast it grows. We have all experienced how our hair grows quicker during the summer, and this increased growth is due to improved blood supply to the hair follicles stimulated by the red light in sunlight. The Laser was first used in some countries of Eastern Europe about 23 year ago for very different diseases to speed up the healing process. A laser produces light measured at a wavelength of nanometers typical between 638.2 nM and 670 nM, a pure wave- length at the peak of red light in the visible light spectrum. Hair Laser light therapy provides the essential boost of pure red light at precisely the right frequency to revitalize and repair hair, yet it utilizes a soft laser that uses less energy than a 40-watt light bulb. In March 2001 a hair laser like ours received wide public and press attention. This laser was named one of TIME Magazine's "Inventions of the Year" , and is receiving favorable press from numerous national magazines, newspapers and television news programs
